Generate supplementary candidates near holes
Apply geometric constraints
• edge clearance
• hole avoidance
• spacing constraints
Any feasible candidates after filtering?
Yes
No
No feasible grip configuration
End
Two-cup configuration?
Yes
No
Apply geometric constraints
• edge clearance
• hole avoidance
• spacing constraints
Skip pair evaluation
Score feasible candidates
• edge clearance
• hole clearance
• centrality
• grip span (for two cups)
Select highest-scoring configuration
Compute waypoints:
• A1 (approach)
• B1 (attach)
• R1 (retreat
Forward to trajectory generation (Layer 4)
End
